

IT Modernisation: Drivers for success

Driving a successful core IT Platform implementation requires the following core elements to be in place.

Our experience shows that some of the key drivers of success for the above core elements include:

On completion of a large scale IT Platform Implementation for a Global Bank:

"I write to congratulate you on the successful system conversion. Please pass my thanks to our colleagues who have worked very long hours over many weeks to get this over the line. A great outcome with credit to many; all of whom I thank. Well done." **CEO, Global Bank**

Having the core elements in place and following the key drivers will set you up for a successful IT Platform Implementation. A short, best practice programme review is a good starting point.
